Birth Date: \_\_\_\_\_ Sex: F \_\_\_ M \_\_\_ Phone: \_\_\_\_\_

Buyer understands that the puppy/dog is being sold as pet quality. This puppy/dog is guaranteed to be delivered in good physical health, and up to date on vaccinations at the time of adoption. The adopter has a period of 7 days after placement date or date acquired to have the puppy/dog examined by a veterinarian of his/her choice. If the adopter chooses to not have the puppy/dog examined within the 7 days of date acquired, then he/she accepts the puppy 'as is' at the time of placement. The adopter agrees to properly house their new puppy/dog, and to provide proper nutrition, and scheduled vaccinations/worming, and veterinary care, as needed or required by state law. Any evidence that the puppy/dog has been neglected or abused will void this contract. If the purchaser feels he/she can no longer care for this puppy/dog, the breeder should be notified so as to assist in finding the puppy/dog a new suitable home. We have plenty of parents waiting to adopt! This puppy/dog is guaranteed to be free of Genetic Health Disorders within the first 2 years of life if the puppy/dog has not been bred and it is found to have a genetic defect. Defect must be certified by a reputable veterinarian, rendering it to be incapacitated and an unsuitable companion. The adopter agrees to surrender the puppy/dog to the breeder with signed registration papers. Contract is void if owner does not agree to return the puppy/dog. Upon return, the breeder agrees to replace the puppy/dog with one of the same type and sex. Replacement will be a puppy/dog of the breeder's choice of stock on hand, or expected litters within one year. The Breeder may request a 2nd opinion to verify the said genetic defect prior to agreeing to replacement. All shipping costs and veterinarian expenses incurred are the sole responsibility of the purchaser and are Non-refundable. A diagnosis of coccidiosis, giardia, parasites, ear mites or any other type of bacterial infection does not render the puppy/dog incapacitated or unsuitable. Guarantee does not cover previously stated conditions or non-life threatening disorders such as hypoglycemia, uneven bites, undescended testicles, cherry eyes, inguinal or umbilical hernias or patellar luxation. Breeder makes no guarantee as to the adult size, color or show quality of puppy.
